PROFESSIONAL EXPERIENCE

DataOne Asia (Philippines), Inc.

Web Developer Intern

Quezon City, Philippines

Nov 2025 – Apr 2026

- Architected a production-ready company website and custom CMS using the MERN stack (MongoDB, Express.js, React, Node.js), reducing content update turnaround from 2–3 business days (developer-dependent code edits and redeployments) to same-day, self-service publishing.
- Consistently delivered features one week ahead of scheduled deadlines by integrating GitHub Copilot into the development workflow, increasing implementation velocity and reducing repetitive coding tasks.

Freelance

Project-based Programmer

Philippines (Remote)

Jan 2026 – Apr 2026

- Improved search indexation and organic traffic for applications serving 200,000+ users by building dedicated SEO-optimized HTML pages and monitoring performance through Google Analytics.
- Increased user retention by identifying and resolving broken links platform-wide using PostHog analytics.
- Reduced partner email outreach turnaround from up to one week (manual, one-by-one sends) to minutes by building a private Chrome extension (Google Apps Script) that automated campaign status tracking and template-based bulk sends.

PROJECTS

CharacTale — Capstone Project

Javascript, React Native, Expo, MongoDB, Gemini API, Cloudinary

- Developed an AI-powered mobile and web learning platform teaching Filipino moral values through interactive storytelling and assessments for Grade 4–6 students.
- Achieved strong ISO 25010 quality ratings from 105 evaluators by leading the mobile app development and building 50% of the web app, enhancing reading and moral values education.

Phase — Subscription Tracking PWA

Next.js, Supabase, Firebase Cloud Messaging, Antigravity IDE

- Built a cross-platform subscription tracking PWA using Next.js, Supabase, and TypeScript, applying modern full-stack patterns for state management and data optimization.
- Engineered a self-managing reminder engine using Firebase Cloud Messaging for automated scheduling and real-time push notification delivery.

EDUCATION

BS Information Technology with specialization in Mobile and Web Applications

National University – Mall of Asia Campus | Summa Cum Laude

Aug 2022 – July 2026

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Frontend / Backend: React, Next.js, React Native, Node.js, Express.js

Databases: MongoDB, PostgreSQL (Supabase), Firebase

DevOps & Tools: Nginx, PM2, Render, Vercel, Git, GitHub, RESTful APIs, Postman

IDEs & Design: Cursor, Antigravity IDE, Visual Studio Code, Figma, Canva

SEO & Analytics: Google Analytics, PostHog, Ahrefs

AI Tools: Claude, Gemini, ChatGPT, GitHub Copilot

CERTIFICATIONS

Test of Practical Competency in ICT — Institute for Information & Communications Technology Promotion

Level 3: Competent, Level 2: Advanced Beginner (2023 – 2026)

IT Specialist — Certiport, a Pearson VUE business

JavaScript & Databases (2026)

Soft Skills: Detail-oriented · Adaptability · Problem-solving · Leadership · Task Prioritization
